

HTML Review Instructions

For this review you will need to recreate the provided design and follow the instructions found below. You can work with a partner or Github and Lamp Stack link to lab 5.

Instructions:

1. Create all the necessary files and directories
2. Using the proper semantic & content elements create the structure of the provided design.
3. Use CSS to create the layout of the design.
4. Using JavaScript or jQuery create the header for the design
5. For the video section find a video or embed an iframe from Youtube.
6. For the form section, use the correct input types to recreate the form from the design.
7. Using JavaScript or jQuery, create an alert saying "form submitted" when the send button is clicked.
8. Make the design responsive on the mobile viewport (600px or less).
